For the Owner — What's Done & What's Yours to Do

A plain-English summary of the recent website work, the guides you now have, and the short list of things only you can do to reach #1 in Cavite.

Hi! Here's everything in one place. Your website's technical foundation for getting found on Google is **done**. The remaining steps are mostly account setup and collecting reviews — and those are the things that actually push you to the top. This page tells you exactly what to do, in order.

✓ What we've already done for you

- ✓ **Contact numbers** — added your landline **(046) 436 6941** and mobile **09215083422** across the site (header, footer, contact page), with one-tap calling.
- ✓ **Google & Facebook review buttons** — "Read reviews" and "Write a review" buttons now link straight to your Google and Facebook pages.
- ✓ **Automatic Google reviews** — the site is built to show your real Google reviews live; it just needs one Google key switched on (see the Reviews guide).
- ✓ **Search-engine basics** — page titles, descriptions, sitemap, and "business info" data are all set up so Google understands who/where you are.
- ✓ **Town pages for all of Cavite** — dedicated pages for Imus, Bacoor, Dasmariñas, General Trias, Kawit & Cavite City, so you can rank in each town, not just Imus.

i Your guides (PDFs)

Guide	Use it to...
Reviews Setup Guide	Turn on automatic Google reviews & point the Facebook buttons at your page
SEO Setup Guide	Verify your site with Google & set up your Business Profile
Road to #1 in Cavite	Your 90-day plan to climb the rankings
This page	The short owner checklist below

! Your action list (in priority order)

Do these 3 first — they matter most

- ☐ **Claim your Google Business Profile** at business.google.com — complete every field, pick the category "Eyebrow bar / Beauty salon", and add lots of photos. *(This is the #1 driver of being found locally.)*
- ☐ **Start collecting Google reviews** — ask every happy client; aim for a few each week. Reply to all of them. *(Reviews are the biggest ranking booster.)*
- ☐ **Confirm the real website address** is live (not a temporary link), then verify it in Google Search Console and submit the sitemap. *(Your developer can do the technical part.)*

Then, when you have time:

- ☐ Switch on automatic Google reviews (get a Google API key — Reviews guide, Section 2 — and give it to your developer).
- ☐ Make sure your name, address & phone are written **identically** on your website, Google, and Facebook.
- ☐ List your business on Waze, Apple Maps, and Philippine beauty directories (same details everywhere).
- ☐ Post on your Google Business Profile weekly (promos, before/afters).

One honest note about "#1"

No website alone can guarantee the #1 spot — Google decides it based mostly on your Business Profile and your reviews. The good news: the website now does its full part, and the 3 priority steps above are squarely within your control. Stay consistent for a few months and the rankings climb. It's a marathon, not a sprint.

Need help?

Hand the technical items (Google key, domain, verification) to your website developer — the detailed files are saved in the project's docs folder. Everything else on the checklist is yours, and none of it requires code.

Emcey Brows Aesthetics · Imus, Cavite — (046) 436 6941 · 09215083422
You've got this. Claim the profile, gather reviews, stay consistent.
