

What We Need From You

You own the Google and Facebook accounts — so a few key things can only be done by you. This guide walks you through exactly what to hand over (and how), so we can finish your website, power up your Google search ranking, and show your real reviews live on the site. No technical knowledge needed — just follow the steps in order.

There are **three jobs** on this page, and each tells you what to *collect* and what *access to grant*. When you grant access on Google or Facebook, send the invite to **our email:** _____ (write it here so you don't forget).

Job	What it gives you	Who does it
1 · Website content	A finished, accurate, on-brand site	YOU + US
2 · Google & SEO	Getting found on Google "near me" searches	GOOGLE
3 · Live reviews	Your real 5-star reviews shown on the site automatically	GOOGLE FACEBOOK

1 Website content & access

So the site shows the right information and we can publish it to your real web address, please send us:

A. Business information (must match everywhere)

- ☐ Exact **business name** as you want it shown
- ☐ Full **address** (the one on your Google Maps listing, word-for-word)
- ☐ **Phone numbers** — landline & mobile
- ☐ **Opening hours** for each day
- ☐ **Email address** for booking enquiries

Why "word-for-word" matters

Google ranks you higher when your name, address & phone number are written *identically* on your website, Google, and Facebook. Even small differences ("St." vs "Street") can hurt. Pick one version and we'll use it everywhere.

B. Brand & photos

- ☐ Your **logo** (highest-quality file you have)
- ☐ **Before/after photos** and studio photos you're happy to publish
- Confirmed **service list & prices** (e.g. the Ombre & Nano promo cards you sent)

- ☐ A short **"about us"** blurb, if you'd like it personalised

C. The web address (domain)

- ☐ Tell us the **domain name** you want (e.g. `emceybrows.com`)
- ☐ If you already bought one, share the **login to the company you bought it from** (GoDaddy, Namecheap, etc.) — or add us so we can point it to the new site
- ☐ If you haven't bought one yet, tell us and we'll guide you

2 Google & SEO setup GOOGLE

This is the most important section for getting **found**. There are three parts — all done from *your* Google account.

2A · Google Business Profile (your Maps listing)

This is the single biggest driver of "eyebrow near me" results. Make us a **manager** so we can optimise it with you:

- 1 Go to `business.google.com` and sign in with the account that owns the listing.
- 2 Open your business → **Settings** (gear icon) → **People & access** (or "Managers").
- 3 Click **Add** → enter **our email** (top of page) → choose role **Manager** → **Invite**.
- 4 Make sure the listing is **verified** (look for the verified badge). If it isn't, Google will mail/SMS you a code — complete that step.

If you've never claimed it

Search your business name on Google Maps → click *"Claim this business"* / *"Own this business?"* and follow the verification. Then do the steps above.

2B · Google Search Console (proves you own the website)

This lets Google index your new site quickly. Two easy options — pick one:

- **Option 1 (simplest):** after we verify the site, we give you a short **verification code**; you do nothing else. — handled by us once the domain is live.
- **Option 2 (you add us):** if you set up Search Console yourself, open it → **Settings** → **Users and permissions** → **Add user** → enter **our email** → permission **Owner** or **Full**.

2C · Google API key for live reviews ALSO POWERS JOB 3

This one key switches on the **automatic, real-time Google reviews** on your site. It takes about 10 minutes and needs a card on file (usage is effectively free at your volume, but Google requires one).

- 1 Go to `console.cloud.google.com` → create a project (call it "Emcey Brows").
- 2 Open **APIs & Services** → **Library** → search **"Places API (New)"** → **Enable**.
- 3 Open **Billing** → add a payment card to the project (required by Google).
- 4 Open **APIs & Services** → **Credentials** → **Create credentials** → **API key**.
- 5 **Copy the key** (starts with `AIza...`) and send it to us privately. We lock it down and install it safely server-side — it never appears in your website's public code.

Don't want to touch billing?

No problem — your reviews still show on the site via the

"Read / Write a review"

buttons that link to your Google page. The API key only adds the *automatic* live-review display. You can switch it on anytime later.

3 Real-time testimonials & reviews

3A · Google reviews GOOGLE

- ☐ Provide the **API key** from step 2C (that's all that's needed — reviews then appear and refresh automatically).
- ☐ Send your **Google Maps listing link**: on Maps, open your business → **Share** → **Copy link**.
- ☐ **Keep asking happy clients** for a Google review and reply to each — this is what actually grows your rating over time.

Good to know

Google shows up to

5 reviews

at a time and chooses which ones — that's a Google rule, not a limit of your site. For specific favourites, send them to us and we'll feature them as hand-picked testimonials too.

3B · Facebook reviews FACEBOOK

Facebook no longer lets *any* website pull its reviews automatically (Meta locked this down). So here's the realistic, durable approach:

- 1 Confirm you have a Facebook **Page** (a business page — not your personal profile).
- 2 Turn **Reviews/Recommendations ON**: on your Page → **Settings** → **Privacy** → **Page and tagging** (or **Templates and tabs** → **enable the Reviews tab**).
- 3 Send us your **Page link** and your **Reviews tab link** (usually facebook.com/YourPageName/reviews). We point the site's Facebook buttons straight at them.
- 4 When a client leaves a great recommendation, **screenshot it or copy the text** and send it over — we'll feature your best ones as testimonials on the site.

Optional:

if you'd like us to help manage the Page, add
our email

as an admin/editor under *Page* → *Settings* → *Page roles / New Pages experience* → *People with access*.

✓ Your one-page checklist

Send us these (most impact first)

- ☐ **Add us as Manager** on your Google Business Profile [GOOGLE](#)
- ☐ **Confirm your name / address / phone / hours** — one exact version
- ☐ **Logo + photos + final services & prices**
- ☐ **Domain name** (and registrar login, if you have one)
- ☐ **Google API key** for live reviews (step 2C) [GOOGLE](#)
- ☐ **Google Maps listing link + Facebook Page & Reviews links** [GOOGLE](#) [FACEBOOK](#)
- ☐ **Turn ON Facebook reviews** tab [FACEBOOK](#)

Item	Where you get it	Send us
Business Profile access	business.google.com → People & access	An invite to our email (Manager)
Maps listing link	Google Maps → your business → Share	The copied link
Google API key	console.cloud.google.com (step 2C)	The AIza... key (privately)
Facebook Page link	Your Facebook Page address bar	Page link + /reviews link
Domain	Your registrar (GoDaddy, etc.)	Name + login, or add us
Content	You	Logo, photos, services, hours

One honest note about reaching #1

No website alone guarantees the top spot — Google decides it mostly from your Business Profile and your reviews. The site now does its full part; the items above are the pieces only you can provide. Hand them over, keep collecting reviews, stay consistent for a few months, and the rankings climb.

Emcey Brows Aesthetics · Imus, Cavite

Send anything sensitive (API key, logins) to us privately — never post them publicly.
